

WE WANT A NEW HOSPITAL NOW!

As a District resident and person of Faith, I fully support the Mayor's proposal to invest District tax dollars into building the National Capital Medical Center (NCMC) at the former location of the DC General Hospital. I further support the city partnering with Howard University.

As a District resident, I will no longer tolerate the injustice of a health care system that provides adequate services to residents in Northwest DC, while parts of Wards 5, 6, and all of 7, and 8 are denied easy access to a full service hospital with "LEVEL ONE TRAUMA SERVICES."

We must increase access to LEVEL ONE TRAUMA services for ALL District residents. It is unethical for District residents to be placed at continued risk because of the unequal and unfair distribution of hospital services.

I strongly urge DC City Councilmembers to vote for all essential legislation that will expand health care justice for all District residents.

The District cannot continue to permit the shameful inequities in access to hospital services and other specialty care that the NCMC will provide.
